

FCB DepositExpress allows your business to deposit checks anytime, 24 hours a day, 7 days a week right from your office. With FCB DepositExpress you can make fewer trips to the bank saving time and money.

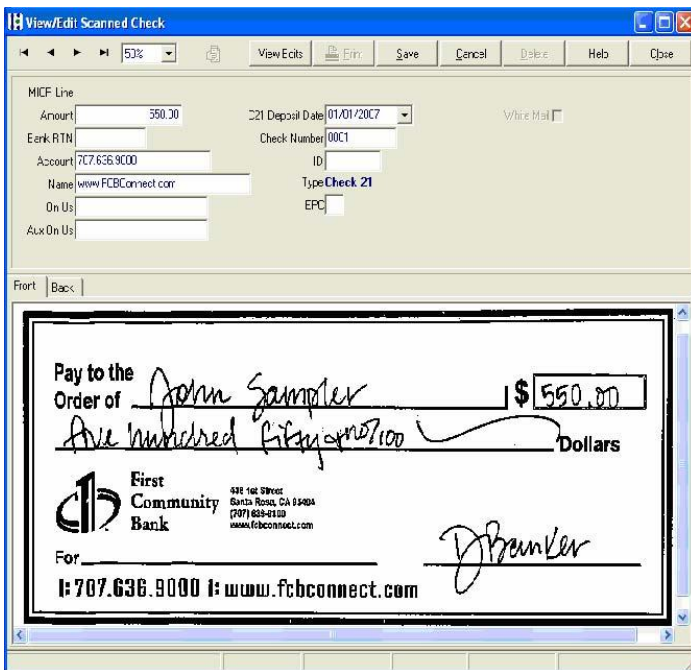

How our product works:

With FCB DepositExpress you simply scan your checks and money orders electronically using our secure processing system. The “captured” images are then uploaded to the bank’s secure server, analyzed for image quality, routed through our bank processing system and credited to your account. This system does not require any special hardware to be purchased beyond the small tabletop scanner needed to scan your transactions and, of course your existing computer. Now you will be able to make deposits on *your schedule!*

What it can do for you:

FCB DepositExpress is a powerful tool that allows you to deposit checks without leaving your office, accelerates check clearing, and enhances your internal controls and fraud protection. With FCB DepositExpress you no longer have to use deposit slips or manually track deposit information. Our system will handle everything for you.

How it can save you money:

Expedited availability of funds—The sooner your deposit is processed, the sooner you receive available funds. Plus, you’ll find out about any returned items more quickly.

Save time and money—No more trips to the bank to make deposits and no more deposit tickets to fill out. Manage the entire deposit process right from your office. Imagine the fuel and mileage expense you’ll be saving!

Security—Reduced chance of lost or stolen items while they are in transit to the bank because they are scanned right in your office. You will automatically maintain a detailed, picture perfect record of each transaction. Reviewing or auditing the bookkeeper’s daily work will be a breeze.
